

POCKETSMART AI

Functional Requirements

1. Introduction

Functional requirements describe the features and operations that PocketSmart AI must provide to users.

2. User Registration

The system shall allow new users to create an account by providing the required registration information.

3. User Login

The system shall allow registered users to securely log in to the application.

4. Budget Input

The system shall allow users to enter the amount of budget available for their plan.

5. Room Selection

The system shall allow users to select the required room, such as a living room.

6. Style Selection

The system shall allow users to select a preferred style, such as modern.

7. Item Selection

The system shall allow users to enter the items they require, such as lights, ceiling fans, and decorations.

8. AI Plan Generation

The system shall process the user inputs and generate a personalized plan using Generative AI.

9. Recommendation Generation

The system shall provide recommendations based on the user's budget and requirements.

10. Result Display

The generated plan shall be displayed clearly on the user interface.

11. Database Management

The system shall store required user and application information in the database.

12. Logout

The system shall allow authenticated users to log out securely.
