

POCKETSMART AI

Non-Functional Requirements

1. Usability

The application should have a simple and user-friendly interface so that users can easily understand and use the available features.

2. Performance

The application should process user requests efficiently and return the generated result within a reasonable amount of time.

3. Security

The system should protect user information and prevent unauthorized access to protected features.

4. Reliability

The system should provide consistent results and handle errors without causing the application to stop unexpectedly.

5. Maintainability

The application should be organized into separate modules so that developers can easily maintain and update the system.

6. Scalability

The system should be designed so that additional features can be added in the future.

7. Availability

The application should be available to users whenever the deployed service is running.

8. Compatibility

The application should work with commonly used modern web browsers.
