

POCKETSMART AI

Project Milestones

Milestone 1 – Problem Identification

The main problem and project objectives were identified.

Milestone 2 – Requirement Completion

The functional and non-functional requirements were documented.

Milestone 3 – Design Completion

The system architecture, DFD, module design, and UI design were completed.

Milestone 4 – Application Development

The frontend and backend components were developed.

Milestone 5 – AI Integration

The Generative AI functionality was connected to the application.

Milestone 6 – Testing

The application was tested using different test cases.

Milestone 7 – Deployment

The application was prepared for deployment.

Milestone 8 – Demonstration

The completed application was demonstrated using screenshots and a demonstration video.
