

POCKETSMART AI

Test Cases

TC01 – Home Page

Test: Open the PocketSmart AI application.

Expected Result: The home page should load successfully.

TC02 – User Registration

Test: Enter valid registration details.

Expected Result: A new user account should be created successfully.

TC03 – User Login

Test: Enter valid login credentials.

Expected Result: The user should be authenticated and redirected to the appropriate page.

TC04 – Budget Input

Test: Enter a valid budget amount.

Expected Result: The budget should be accepted by the planner.

TC05 – Planner Input

Test: Select a room, style, and required items.

Expected Result: The selected information should be accepted.

TC06 – Generate Plan

Test: Submit valid planner information.

Expected Result: The application should process the request and display the generated plan.

TC07 – Empty Input

Test: Submit the planner without required information.

Expected Result: The application should display an appropriate validation message.

TC08 – AI Service Error

Test: Generate a plan when the AI service is unavailable.

Expected Result: The application should display an appropriate error message instead of crashing.

TC09 – Database

Test: Store and retrieve required application information.

Expected Result: The information should be stored and retrieved correctly.

TC10 – Logout

Test: Select the logout option.

Expected Result: The user should be logged out securely.
